The paper handling abilities of this printer includes a paper input capacity of up to 250 sheets of plain paper. Similarly, the paper output tray can hold up to 100 sheets of paper in a face-down pattern. On the other hand, the printer also runs a duplex printing ability to print on both sides of the article. Download Brother HL-2170W driver from Brother wireless printers allow you to connect with a wireless network to avail the reap the benefits of network printing. Brother printer users can Brother hI-2170W wireless setup to the wifi network without taking any technical assistance. Are you Connecting a new printer to your PC can create a variety of problems. A printer requires space, a power source and, typically, a cable that has to be connected to your computer but that is rarely included. brother hl-2170w wireless printer setup can be connected wirelessly, however, eliminating the need for a cable while also simplifying the method to connect other computers to the printer. Step 1. Using a Network Cable (or via Wireless Setup Wizard) Before configuring your printer's wireless settings, you should be evident with the wireless router or AP's network safety settings. Record for further use these configurations. Network Name (SSID: Extended Service Set ID, ESSID: Extended Service Set ID) Network Key (Password, Security Key or Encryption Key, etc.) This detail can be found in the router device documentation or at the back. Step 1: Set the settings. Depending on your OS, the screens may vary. Step 2: Connect to your Brother device one end of your AC power cord and to the AC power source one end. Step 3: Switch on the machine of your brother. Step 4: Turn on your administrator computer system. Step 5: Insert in your CD-ROM drive the given CD-ROM. Note: Download the Wireless Setup Wizard for Windows or Macintosh if you don't need a CD-ROM. Step 6: The opening screen will provide choices for model and language selection (for windows). Step 7: Double-click on your desktop's HLxxxx icon (xxxx= your model name) and then double-click Start Here or Start OSX icon here. If necessary, select the template and language (for windows). Step 8: From the primary CD-ROM menu, click Install Printer Driver. Step 9: Click on users of the Wireless Network. Step 10: Choose Wireless Setup and Driver Install (Recommended) as the Wireless Installation Type alternative and click Next. Step 11: Choose the configuration technique for environments as: Step 12: Step by Step Install (Recommended) >> Next >> Cable (Recommended), Or Automatic (Recommended) >> Next Step 13: Connect the printer to your access point via a network cable and press Next. Step 14: Choose the printer from the device configuration wizard that you want to configure and press Next. Note: If the access point is not listed, check whether or not the printer is switched on. Click button Refresh. Step 15: The wizard is searching for your printer's wireless networks. Step 16: Choose the AP you want the printer to set up and configure. Click Next, then. Step 17: A screen may appear requesting the unsecured WLAN access point / router's Network Name (SSID, ESSID). Step 18: You can also configure your brother printer's authentication and encryption settings. From the pull-down environment, choose the required authentication method and encryption mode. Step 19: Enter Network Key and Confirm Network Key at last, and press Next. Step 20: Before clicking the Next button, check the settings. Step 21: If you want to manually modify your IP address, commit the modifications here. Step 22: To disable the settings, click the Cancel button. Step 23: Now you can disconnect your AP and printer network cable and click Next. Step 24: Follow the directions on the screen to install the wifi link printer driver. The setup of the driver begins automatically. Step 25: Click Cancel to complete the process if the drivers are already mounted. Step 2. Using Automatic Wireless mode (Wi-Fi Protected Setup) You can readily connect your Brother printer to your wireless networks if your router or AP supports WPS. Connect Brother HL2170w Printer to WiFi the wireless settings in the following steps: Step 1: Keep Brother device positioning within the scope of your access point / router compatible with WPS. Step 2: Try to ensure the source is connected to the machine on and wait until the machine is ready for the Brother. Step 4: Press and hold for a while on your WLAN access point / router the WPS or AOSSTM button. Step 5: For a maximum of 2 seconds, press the wireless installation button on the back of the device searches automatically for WLAN access point / router supporting Wi-Fi Protected Setup mode. The Toner LED begins to blink during the 2-min period. Step 7: The printer connects to the point / router for WLAN access. The Toner and Drum LEDs will begin blinking during that moment. Step 8: Wait until your machine's Ready LED shows Connected. Note: This Ready LED will turn on for 5 minutes, which is a successful sign that your WLAN access point / router has been linked effectively. If you do not see the blinking of the Ready LED, this implies that the printer has not been able to link to your WLAN access point / router. If the link setup failed, check the handbook for WLAN error codes. So, the brother hl-2170w wireless setup is lastly complete now. Printer won't print error in Brother Printer may appear due to many reasons. Fix Brother HL-270W printer won't print error to save your printer from future damages.his error can appear due to several reasons. Unclean printer and lack of maintenance are one of such reasons.
